

PRESS RELEASE

EMBION announces today the formation of its Science and Advisory Board

Ecublens, 19.11.2020 – EMBION Technologies S.A., hard-tech innovator in the production of plant and microbial bioactives from biomass announces the formation of its scientific board. The company aims to extend the board’s knowledge scope in line with its growth trajectory and global expansion plans.

EMBION Technologies S.A. is a leading science and technology-oriented company, focused on the development and exploration of ionic catalytic hydrolysis. The company targets the extraction and formulation of potent plant based bioactives for application in the extended scope of nutrition and health.

Today, the company is taking a step forward by establishing its Science and Advisory Board.

“We feel it is the right moment for us to form a Scientific and Advisory Board and we are convinced that this step will empower our science and technology focus even further”, says Georgios Savoglidis, EMBION CEO and Co-founder.

“We are very enthusiastic that we could interest Paul Dyson, EPFL Professor and Dr.- Ing. J.J.Bänsch a former SVP at Nestlé to act as founding members. This is a milestone in the breathtaking development of our company”, he continues.

“I am thrilled to build and chair the Embion Scientific Advisory Board. A sound and broad scientific understanding will drive Embion’s innovation capacity. Leveraging my knowledge and competence in human food and skin health, I look forward to contributing in the current and future EMBION successes”, says Bänsch.

The company aims to be extending the board’s knowledge scope with more announcements to come soon.
